August 2002 - February 2007

System Analysis, Planning

Projects

Nohut Academy API, Administration Panel, and App Software Development – ElitSoft / Nohut Academy

July 2023 to January 2025 – Laravel/React/Alpine.js developer – Senior

Nohut Academy Learning Management System (LMS) was developed using Laravel PHP Framework, React JavaScript UI Library, Alpine JavaScript Framework, and Tailwind CSS Framework mainly. Laravel Framework was used to implement and develop an administration panel and OAuth 2.0 based API. The API provides secure access to the server system by various types of client applications including a React app called "Penpan". Penpan provides an environment for taking exams and studying. The administration panel is used by various types of users with different access levels or roles and permissions that act or cooperate in a complex educational organization, including its branches and channels, their various personnel, teachers, students and their parents.

WWW.SOZCU.COM.TR

Software/Web Development – PATH

August 2022 to February 2023 – Wordpress/PHP/JavaScript developer – Senior

It is among the 20 most popular websites in Turkey. It is a popular news website that its maintenance and development project was outsourced to PATH. The main website has been built and developed on Wordpress content management system. The website and related administration panels were maintained and developed. A number of custom Wordpress plugins were developed to meet some special requirements of managing a news website.
